Embedded System for Condition Monitoring of Marine Pumps

By

Timothy James Guite

July 2, 2018

Abstract

This will be the abstract which discusses the findings of the paper in < 600 words.

Acknowledgements

This is the page which includes acknowledgements of people who have been helpful in completion of the dissertation.

Chapter 1

Introduction

This is the introduction to the dissertation, which will lay out the problem of condition monitoring of marine pumps and explain some of the background around condition monitoring.

1.1 Condition Monitoring

1.2 Marine Pumps

1.3 Embedded Systems/Wireless Sensor Networks
